

CLEANING AND CARE GUIDELINES

Our Fine Oriental Carpets & Hawaiian Rugs® will add beauty and elegance to your home. These fine floor coverings will be used and enjoyed by you and your family for generations to come. Our unique designs are produced by highly skilled weavers using the finest materials. You will find these guidelines helpful in the care and maintenance of your purchase.

THE WONDERS OF WOOL

Fine Oriental Carpets & Hawaiian Rugs® are generally made of wool and are easily and economically maintainable. Rugs of wool are extremely durable and consistently out-perform other materials. Unlike other fibers, wool is much more resilient, cleans better, and stays clean longer.

CLEANING

A professional Oriental rug cleaning will enhance your carpets, bringing out the richness of color and softness of the wool. Depending on the amount of traffic, a professional washing is recommended every one to three years for the cleaning of your Oriental rugs.

ROTATION

To insure even wear; your rug should be rotated once a year. Depending on the traffic, the rotation may vary from six months to two years.

VACUUMING

Oriental rugs, like most carpeting, should be vacuumed on a regular basis to remove dirt and restore life to the fibers. Be sure not to vacuum the fringe.

* These cleaning tips are merely suggestions. Use common sense and consult a professional immediately. For more information, go to: www.WoolCarpet.com

PADDING

A quality pad used under your rug helps protect it from dirt, wear, and slippage. We will be happy to provide you with the correct padding.

RESTORATION

In case of damage, just about any problem has a solution with a professional restoration. Old and antique rugs sometimes need to be rewoven where worn and restored to life. Newer rugs are rarely in need of repair. We can help you with all your restoration requirements.

BLOTTING & STAIN REMOVING

When spills occur, dilute with plenty of water. Next, blot from the edge of the spill towards the center. Avoid rubbing the area. For solid pills, take a spoon and carefully scoop up the material. It is always best to attack the spill immediately. The following information and chart will help you eliminate most stains. For further advice, contact us at (808) 524-7769 or email to indichcoll@aol.com. We will be glad to help.

GENERAL STAIN REMOVAL PROCEDURE

Always rub or brush lightly from the outer edge toward the center of the stain to prevent spreading or causing "the ring" when using solvents, especially on twist rugs and pile carpets. On old, dry or stubborn stain, saturate, blot, and brush. Repeat this operation as often as necessary to remove the stain completely.

STAIN REMOVAL PACKAGE

You must move quickly, so please keep a small container with the following items close:

- Clean Cloths
- A Clothes Brush
- Mild Detergent (no bleaching or alkalies)
- White Vinegar
- Dry Cleaning Fluid
- Weak Ammonia (7% solution)
- Sponges
- Alcohol
- Glycerin

HOW TO CLEAN STAINS

1. Work quickly.
2. Blot up excess pills with paper towels. Do not rub.
3. Apply antidote(s) as shown on list with a clean cloth, working from edge to center.
4. Do not soak.
5. Pat with paper towels. Dry with fan or hair blower.
6. Restore pile with clothes brush.

REMOVING WAX

Put a blotter or brown paper bag over the spot. Put hot iron over the blotter. Wait a few minutes until the wax is absorbed into the blotter. Repeat if necessary. Move the iron constantly and do not let it stay in one place.

REMOVING INK

Saturate the spot with hairspray. Allow it to dry. Brush lightly with a solution of water and vinegar.

REMOVING GLUE

Saturate the spot with a cloth soaked in vinegar or alcohol.

REMOVING CHEWING GUM

Press ice cubes against spot. Wait until it becomes brittle and breaks off. Use spot remover to vanish last traces of the spot.
